TECHNICAL SKILLS

Languages

JavaScript, TypeScript, Python

Frontend

React, Next.js, Tailwind CSS, HTML5, CSS3, Framer Motion, Figma

Backend

Node.js, NestJS, Express, REST APIs

Databases

PostgreSQL, MySQL, Oracle SQL

Infra

Docker, Git, GitHub/GitLab, OpenShift, Agile/Scrum, Vercel

AI Tools

Claude Code, AI-Driven Development, LLM Orchestration, Agentic Workflows

EDUCATION

Henry Bootcamp

Full Stack Web Developer

Jun 2022 – Dec 2022

Continuous self-directed learning in modern web development and software development (2023 – Present)

LANGUAGES

Spanish — Native

English — Upper Intermediate (B2)

SOFT SKILLS

Ownership

End-to-end responsibility from architecture to deployment and client delivery.

Communication

Translates complex technical concepts for non-technical stakeholders using clear analogies.

Conflict Resolution

Manages client expectations around deadlines and unexpected issues with transparency.

Fast Learner

Track record of picking up new frameworks and shipping them to production quickly.

TOMAS PEREZ

Building software that solves real problems, not just technical ones.

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building and shipping web applications using Node.js, React, Next.js, Tailwind CSS and TypeScript. Proven ability to own projects end-to-end, from architecture decisions and client communication to deployment and delivery. Currently developing enterprise platforms in the insurance sector while maintaining an active freelance practice with clients including a SoundCloud-partnered SaaS and agency collaborations. Known for translating complex technical challenges into clear communication for non-technical stakeholders, resolving conflicts around deadlines, and delivering production-ready code under tight timelines. Looking for a role close to product development where I can make key decisions and grow both technically and professionally.

PROFESSIONAL EXPERIENCE

Full Stack Developer (Backend Oriented) — *Zurich / Santander*

May 2025 – Present | Insurance Platforms | **Microservices / Monorepo**

Developing and maintaining internal enterprise platforms in the insurance sector, focused on system modernization, performance optimization and business-critical feature delivery.

- Resolved 44 security vulnerabilities across 2 React front-end projects in 3 days to enable migration to Gluon (Santander DevOps tooling) — originally scoped at 700+ hours of analysis and development.
- Reduced PDF report generation response times by 50% in a Node.js API through query optimization and caching strategies.
- Led modernization of legacy systems and internal APIs, improving maintainability across multiple platforms.
- Collaborated with cross-functional teams in an agile environment, bridging communication between technical and business stakeholders.

Full Stack Developer — *DJ Presskit*

Mar 2025 – Present | Freelance | **Multitenant** dj-presskit.com

Co-developed a SaaS platform that generates professional digital press kit websites for DJs and music producers. Official SoundCloud partner serving 60+ artists with exclusive capsule-based designs (limited to 25 DJs per edition), custom subdomains, and a real-time content management dashboard.

- Built the dashboard system where artists manage their press kit content, bio, events calendar, releases, media gallery, and technical rider with real-time updates reflected on their live site.
- Developed dynamic press kit website generation using Next.js, rendering personalized artist pages with hero sections, SoundCloud/YouTube embeds, synced event calendars, and optimized galleries.
- Implemented the capsule design system allowing exclusive visual themes (colors, textures, layouts) limited per edition, ensuring brand differentiation for each artist.
- Integrated the SoundCloud API for music playback and release management, plus YouTube embeds for visual content, all within a booker-optimized browsing experience.
- Contributed to the full stack architecture supporting multi-tenant artist sites, custom domain configuration, and scalable content delivery.

Frontend Developer — *iPhone BRC*

Feb 2025 – Mar 2025 | Freelance | Real Labs | ibrc.com.ar

Developed a high-conversion e-commerce landing page for a leading Apple product retailer in Bariloche, Argentina. The site reached 13,000+ views in its first 90 days of launch.

- Built a fully responsive Next.js landing with animated video hero, product showcases, and WhatsApp-integrated CTAs.
- Implemented smooth scroll animations, infinite logo carousels, and dynamic product cards with Cloudflare image optimization.
- Delivered an SEO- and mobile-performance-optimized site on short deadlines, coordinating directly with Real Labs' design and branding teams.

SELECTED PROJECTS

Backend Developer — *Tienda Lo quiero acá!*

Mar 2026 – Present **Hexagonal**

Development and maintenance of backend APIs on a large-scale NestJS and TypeScript codebase, structured under hexagonal architecture and Clean Architecture principles. The APIs are part of a retailer's service ecosystem with strict separation between domain, application and infrastructure layers.

- Work on a large NestJS codebase following hexagonal architecture — business logic encapsulated in the domain, ports as contracts and interchangeable adapters for persistence and external services.
- Consistent application of SOLID principles, interface-based dependency injection, ORM-decoupled repositories, and single-responsibility services.
- Implemented and consumed Redis caching to optimize responses on high-traffic endpoints, reducing load on the primary database.
- Navigated and contributed effectively to a large pre-existing codebase, quickly adapting to the team's established conventions and patterns.

Fullstack dev — *Property Scraper*

Oct 2024– Dec 2024

Developed a full stack web scraping system for a real estate client, extracting property data from Mercado Libre and Zonaprop. Owned the entire project: client communication, architecture, development and deployment.

- Managed the client relationship end-to-end, translating non-technical requirements into actionable features through active listening.
- Overcame platform security measures and optimized scraping response times through async JS and Puppeteer tuning.
- Built backend PDF report generation with customizable data, delivering a complete business tool from scratch.

Fullstack dev — *Spotsline Web*

Jan 2024 – Apr 2024

Built an e-commerce platform for an Argentine metallurgical company with high-volume clients and stock management. Acted as primary technical contact, explaining complex issues to non-technical stakeholders.

- Integrated a local DBS database with a SQL Server replica ensuring data accessibility and security.
- Learned and implemented Framer Motion animations in under a week, improving UX and visual engagement.
- Optimized React component performance with useCallback and useDebounce patterns.

Fullstack dev — *Myfotolibro Web*

Oct 2023 – Dec 2023

Developed a photo book platform for a client, managing custom upload links, image compression, and print-ready photo delivery. Handled client communication for technical decisions.

- Built an image compression system optimizing format and weight for professional printing standards.
- Adjusted the Cloudinary API integration to maximize functionality within free-tier limits.

Fullstack dev — *Hydrotek Store*

Jul 2023 – Dec 2023

Co-developed an e-commerce platform with product management, users, discount coupons and an integrated blog. First production deployment — faced real-world optimization and billing integration challenges.

- Learned and implemented NestJS, TypeScript and Prisma ORM in under two weeks to meet project deadlines.
- Reverse-engineered and integrated a billing system that had zero documentation available.

Fullstack dev — *Properties && You*

Nov 2022 – Dec 2022 | Henry Bootcamp | Team of 6

Real estate marketplace with advanced filters, payment gateway and dashboard. PERN stack, Tailwind CSS, Firebase and Mercado Pago.

- Led a team of six developers — planning tasks, resolving blockers and ensuring collaborative delivery.
- Picked up Tailwind CSS, Mercado Pago checkout and Firebase in just one week to meet sprint deadlines.
